CODE DESCRIPTION

Described:	Model Code	Gear	Worm Shaft		Motor		
Example:	SE 14	85	12 E	R	24 (E) 001		

001 —— Code of speed

24 DC24V input voltage ; "E"means hall installed inside the motor

220 AC220 input voltage

R —— Motor position, right side
L —— Motor position, left side

None —— Shaft opposite to motor, capped end
E —— Shaft opposite to motor, with encoder

None —— Omitted with motor
12 —— 12mm keyed shaft
16 —— 16mm keyed shaft
25 —— 25mm keyed shaft

85 —— Redution ratio
14 —— Diameter of raceway in inch

SE —— Enclosed housing slewing drive
PE —— Precise enclosed housing slewing drive
ZE —— Zero backlash enclosed housing slewing drive
VE —— Vertical enclosed housing slewing drive
